

WeatherDataCollection
::displayAverageWindSpeed

WeatherDataCollection
::displayMonthlyTemperatures

WeatherDataCollection
::getDataForSpecificMonthYear

```
graph LR; A[WeatherDataCollection::displayAverageWindSpeed] --> D[WeatherDataCollection::getDataForSpecificMonthYear]; B[WeatherDataCollection::displayMonthlyTemperatures] --> D;
```

The diagram illustrates two separate calls to the WeatherDataCollection class. On the left, two boxes represent these calls: one for ::displayAverageWindSpeed and another for ::displayMonthlyTemperatures. Blue arrows from both boxes point to a single box on the right, which represents the ::getDataForSpecificMonthYear method. The box on the right is shaded gray, while the others are white.
